I put up in New Delhi Posts: Hi In reply to your query, I would give you short details on the two degrees and then would elaborate more on the differences. I said two as there is nothing called the B. Yes its called B. Its a 3 year graduation course. Now coming to the B. Tech; it is called the Bachelors in Technology. Its a 4 year long program which is also a graduation course. Students of only the Science Background can pursue it. E is the Bachelor in Engineering. Tech and 4 years long course. Graduation program which can be done only by Science 12th pass students. Now the major difference between the B. Sc and the B. Tech lies within the period of the course which is 3 in case of B. Sc and 4 in each case of B. Tech is considered a superior course to B. Like a college providing only Engineering course, Medical courses, etc. Such colleges called the Engineering course as Bachelor in Engineering i. E Later there were bigger and better universities emerging and they started calling Engineering course as the Bachelor in Technology. This is the main difference between the two. Otherwise the course wise, content wise all is same.
