Badlands Heart by Ruth Langan is book 3 of the *Badlands* series. This one is about the sister, Kitty Conover. Kitty is not a girly girl. She is out rounding up a wild stallion and the mustangs that follow him, to take home and saddle break them to sell.

Besides, as we all know: No one escapes the Badlands. Welcome back to another episode of Into the Badlands! If you need to refresh your memory on what our favorite Badlands characters have been up to, you can check out past recaps here. Poor Veil finds herself an unwitting pawn in the chess match between the Widow and Quinn, who have agreed to forge an alliance against the other Barons. And while Sunny defeated a bunch of formidable Abbots to come to M. Although Sunny and co. Zoom In Sunny, however, is trapped inside his Dream Farm, but definitely looks unsettled by a voice calling on the wind. They load up Sunny in the back of their Fury Road car and head out. When Veil calls out to him, though, she disappears. Sunny finds him in his room attempting to hide his hands from sight, and when he finally gets a good look his son has a clean cut across his palm. Initially, Henry lies about how it happened, and when Sunny presses for the truth reaches beneath his bed to take out a familiar weapon: On the drive back to the monastery, M. Aww, new friends in unexpected places! We finally learn along with M. When they laughed in her face, she deliberately cut herself to activate her dark abilities - but in the bloodbath that ensued no one made it out alive, not even the people she was trying to help. Further investigation out the window reveals that her cogs are running from her fields and her maids are actually ransacking her room, taking fistfuls of jewelry. When Jade orders them to stop one of them strides up and smacks her across the face. Jade knows now she has to get out - and fast - because now things have gone from bath to worse. Enter creepy Quinn, stage left. Zoom In Sunny wakes up from a dream within his dream just before a white hand slips up from under the bedsheets and wraps around his throat. Henry reveals Artemis inflicted them, angry that Sunny had taken the sword. Within that reveal is the admission that Sunny was going to help M. The Abbots and novices are all sitting around the table having a very punctual dinner, which enables Bajie and M. Unfortunately, Bajie and M. So much for an easy in and out. The Master warns M. She pretends to care, but all she wants to do is control those with the gift. At first glance, our heroes might be outnumbered but Bajie whispers an ingenious plan to M. It pays off, and the two of them escape while the activated novices encircle the Master. A set of equally bloody footprints trails away from her, and when Sunny follows the creepy bread trail he discovers Henry in the pigpen, covered in blood. He picks it up and charges into the woods, demanding that Artemis show herself. The tattoos on his back start to bleed. But as they prepare to hit the road again, Bajie takes advantage of some alone time to reach into his pocket for something. Hopefully Veil and Henry will fare better than their dreamworld counterparts. Share your theories in the comments or tweet us Syfyfangrrls.

Chapter 2 : Maps - Badlands National Park (U.S. National Park Service)

After the great story of the BADLANDS LEGEND, this story was a disappointment. The characters were interesting and the tension was realistic but I had a couple of problems with this tale. First, our hero, Bo Chandler was a bit too perfect.

Veil took refuge with the Widow for a short time before the baroness gave her back to Quinn as a part of the terms of their alliance. It was all a Dream While Sunny dealt with his hallucinations, M. The pair argued quite a bit before heading to the Abbots. On the road, they shared stories about why they left the monastery. Bajie left because a young girl named Flea that he was training lost control on a mission. She killed everyone including the people they were trying to save. Veil, Sunny, and an older Henry. In his hallucinations, Sunny awakened to Veil and an older Henry. Things seemed fine until the former clipper found pigs in their barn with crosses cut into their sides. Veil quickly became worried for her son and his safety. When Veil tried to take Henry and leave, Henry killed her. Sunny went after Artemis and faced the ghosts of those he clipped as well as his fear that Henry will end up being a killer like him. Short on time, M. It came as no surprise that they got caught. Bajie smartly cut the Abbot trainees, forcing them to go dark and use their gifts against one another. The Master was left to stop her students from killing each other. The needles and the scroll worked and Sunny woke up from his nightmarish hallucinations. While he recovered, Bajie revealed to M. Jade got more than she could handle when they led an assault on her house. Before she could flee, she got captured and most of her clippers were killed or injured. Instead of killing her he decided to leave her in the wild to fend for herself. This is the only time I ever want to see Veil seriously injured or dead. Those hallucinations went from being emotional because of Henry and Sunny to stressful. Bajie stealing the compass was no surprise. We shall have to wait and see. Next week, Sunny and M. Maybe Quinn will show his face too. Mary Ann slapping Jade was quite a moment as well. Agree with my rating?

Chasing down wild Mustangs is something that Kitty Conover had become very good at. She was tracking one of the biggest herd she had ever seen when a gunshot rang through the valley. She decided to find out who was hiding instead of chasing the herd or the fleeing gunmen. Not hiding, Bo Chandler was in too much pain from the shot he had taken in the back. He had no idea who had shot him, he was watching the wonderful herd of wild Mustangs run. Waking up to an angel Set in , Dakota Territory. Waking up to an angels face, Kitty had saved his life and in return, he ended up saving her too. Helping at the cabin, Bo found he had a knack with the wild Mustangs that Kitty loved, he also found a place for himself in the town of Misery, but the men who shot him could come back and destroy all of the beauty and peace that he had found. Different type of story line than I am use to, delightfully unexpected. No pretense, no deception, no hidden anything, just a story about a chance meeting and the attraction of strong willed people that never thought they would find anything like each other. Mostly about feelings, not much in the way of action except Bo being shot at. This one is about the sister. Kitty is not a girly girl. She is out rounding up a wild stallion and the mustangs that follow him, to take home and saddle break them to sell. She comes across Bo Chandler who was shot very badly. Then takes him back to the farm where she lives with the man who took her and her two brothers in when they had no one when they were Badlands Heart by Ruth Langan is book 3 of the Badlands series. Then takes him back to the farm where she lives with the man who took her and her two brothers in when they had no one when they were small. Bo helps at the farm. A lot goes on in this book. It is a very good read. This is my absolute favorite book and the only one I can re-read over and over. I had to tape the spine from reading it so much!

By Jesse Schedeen Warning: Full spoilers for the episode below. Into the Badlands was a very Sunny-driven show in its first season, but much less so in Season 2. Sunny may have defeated Cyan in mortal combat last week, but Cyan nearly had the last laugh as he left his opponent to die a slow, painful death while tormented by visions of the life he might have had. A solid premise, to be sure. There was certainly an emotional weight to seeing Sunny "reunited" with Veil and meeting his son for the first time. Sunny this season has been a man truly haunted by the ghosts of his past and the hundreds of lives he took as a Clipper. My problem with this storyline is mainly that it felt a little repetitive and drawn-out. These scenes tended to lose their impact after a while as they kept recycling the same beats - Sunny is happy to be with his family, something strange and unsettling happens, the real world begins to intrude, etc. The brief clash between the newly minted Baroness Jade and the Widow definitely suffered as a result. I would have liked to see more of this conflict, both the massive war unfolding outside and the big reunion between Jade and her ex-husband. In general, Season 2 seems slightly better-paced than Season 1, despite being four episodes longer. It will be interesting to see what role Jade plays in the remainder of the season. Jade again proved herself a stronger person than Ryder, remaining defiant in the face of certain death. It was fun watching the two get to know each other a little even as they raced against time to save the dying Sunny. None of the fight scenes in this episode necessarily stand out as the best of the season. You could see director Stephen Fung doing his best to mask that problem, but the result is too many weirdly framed shots that detract from the flow of the action. Here was the perfect opportunity to show what the ultimate warrior in the Badlands is capable of, yet we only got a few brief glimpses of her swatting aside her bloodthirsty pupils and staring fixedly at M. The Verdict While it definitely had its moments, " Black Heart, White Mountain " stands as the weakest installment of Season 2 to date. But at least M.

Chapter 5 : 7-THE BADLANDS - PART ONE - North Dakota Geology

Drumheller lies in the heart of the Canadian Badlands, approximately hours NE of Calgary and 3 hours SE of Edmonton. The Canadian Badlands is a renowned for it's unforgettable landscapes. Home to Dinosaur Provincial Park, a UNESCO World Heritage Site, visitors come from all over the world to explore this special place.

Season 2 Recap Full Recap After the fight with the Abbots, Sunny lies lifeless on the ground of the ski lodge, with his eyes open and his hand over his chest. In a dream, Sunny "with no kill tats on his back" lies in bed at a farmhouse. Veil enters and kisses him. A year-old Henry enters, as Sunny bewilderedly stares at his family. When he looks out the window, he sees the ghostly figure of a girl. In the present, M. They play together near the barn, but Henry recoils when he sees their pigs have been slaughtered and arranged in a row with the sign of crosses in their backs. Sunny lies and tells Henry a wolf did it. Bajie reminds him that neither of them have their gift anymore and the mission will be risky, but M. In his dream, Sunny notices the ghostly girl staring at him from the woods, but she disappears. Veil comes out of the farmhouse and voices concern about what happened with the pigs. Sunny promises to protect her. Henry admits he accidentally cut himself with a sword he got from Artemis, a girl he met in the woods. Sunny warns Henry to stay away from Artemis. Bajie admits he left the Monastery because of a girl named Flea, his Novice at the time, who was cleansed after her violent chi-enhanced attack while trying to save a dark one from slavers. Not even the people she was trying to help," Bajie recounts. At her mansion, Jade catches a group of house Cogs stealing from her. The Cogs are deserting and the armadillo Clippers are pledging their loyalty to the Widow. Henry says Artemis did it to him because she was angry over Sunny taking the sword. Veil rushes in and tends to Henry. In the kitchen, the ghostly figure that Sunny had been seeing appears and grabs him by the neck. The Widow and Tilda corner Jade, who tries to attack them but is quickly disarmed. Quinn speaks privately to Jade and notes how she rose to power after being a Cog, just like him. At the Monastery, Bajie tells M. Bajie secretly pockets it and tells M. The Master appears and launches Bajie and M. She welcomes Bajie "home" and declares him a disappointment. The Master blames Bajie, warning that he only cares about himself, and orders the Novices and Abbots to attack. While the huge brawl unfolds, M. He hears Veil scream, returns to the farmhouse and finds Veil dead. He sobs as he holds her body, then notices bloody footsteps and follows them outside. Artemis points him in the direction of the pig pen, where Sunny finds Henry covered in blood. Sunny grabs a sword and runs to the woods to find Artemis. In the present, Sunny convulses. Bajie uses the scroll to determine where to place the needles into Sunny. After he embeds the last one, Sunny awakens. The next morning, M. Bajie says he plans to find Flea somewhere in the Badlands.

The badlands landscape is a rugged and hilly one, best viewed from above, looking down on the hills, not up at them, as we usually view buttes. Black veins of lignite coal may be seen eroding out of the steep badlands slopes. Reddish bands of clinker add vivid colors to the area. Pieces of petrified wood, as well as fossil stumps and logs, litter the surface. Behind us stretch rolling plains, interrupted only by occasional buttes. Castellated sandstone structures, resulting in towering or battlement shapes, can be seen at the top of the butte. Such structures are examples of one of many kinds of badlands erosion. Age of the Badlands Materials Badlands topography is found in several places on the plains of the U. The South Heart Badlands are an erosional remnant of what was once a large butte or group of buttes. The South Heart Badlands are carved mainly from strata of Eocene and Oligocene age, ranging between 55 and 25 million years old. The youngest beds belong to the Miocene Arikaree Formation sandstone 22 million years old, which caps some badlands buttes. The materials being eroded in these, our most extensive area of badlands, are much older than those in the South Heart Badlands. The dark and somber, gray and purple beds of the Hell Creek Formation contain dinosaur fossils. This badlands topography is located about three miles northeast of Marmarth in Slope County. The materials are Cretaceous in age, about 65 million years old. In contrast to the badlands farther north, which are shades of light brown, these older beds are darker, tending to be purple and gray. They contain dinosaur fossils. The beds that have been eroded into these badlands are too young for dinosaur fossils; the dinosaurs were already extinct when they were deposited. As the mountains rose, they were attacked by intense erosion, providing sediment to eastward-flowing rivers and streams. Sediment from the eroding mountains accumulated into thick layers of soft, poorly lithified siltstone, claystone, and sandstone: These are the sediments we see exposed today in the Little Missouri Badlands. Why the Badlands Formed Fig. The material is a clay that forms a popcorn-like surface when it is dry. When wet, it is sticky and slippery. The clay is a weathering product of volcanic ash. Before a glacier diverted it, the Little Missouri River flowed northward through a broad, smooth valley, joining the early Yellowstone River in northern Williams County. The Little Missouri and Yellowstone rivers came together near Alamo about 30 miles north of Williston in a place now buried beneath feet of glacial deposits. The diversion of the Little Missouri River, away from its route to the north, probably happened sometime prior to the deposition of a volcanic ash bed on the glacial sediment blocking the channel the ash was deposited as a result of a volcanic eruption in the area of Yellowstone Park, years ago. It is possible, though, that an earlier glacier might have diverted the river "the ,year figure is a minimum date; erosion of the badlands may have begun as early as 3. Since it was diverted by glacial ice, the Little Missouri River has flowed over a shorter and steeper route than it did prior to its diversion. When the river assumed its new, shorter route toward the Gulf of Mexico, it began a vigorous erosion cycle, cutting down more rapidly and deeply and sculpting badlands topography. Notice that certain beds can be followed across the entire vista, although they may be discontinuous, eroded away in places. An example is the bluish gray layer that forms the surface of many table-like pedestals. This layer is a bentonitic clay, a weathered volcanic ash deposit. The layers shown here are slightly younger than are those exposed in the South Unit of the park. Total relief here, from valley floor to upland surface, is about feet.
