Draw a path of light ray passing through a prism. Label angle of incidence and angle of deviation in the ray diagram.

**Chapter 3 : CBSE Class X Sample Papers**

*The CBSE sample question paper for class 10 Science involves PDF files for download, practice papers, solved papers, online tests, NCERT solutions, and model question papers. Class 10 Science can be divided into three major categories namely Physics, Chemistry, and Biology.*

**Question Paper** These question papers will not only help you to get more probable questions that may come in board exam but also, the pattern of the exam will be clearer to you. I know, it is such a headache having Board exams first time in a life, but at the same time, you will feel an intense excitement in you. Just have some ideas from here on how to deal with the exam, and things will surely get better. I have seen students tensed during exam time, even when they have all their concepts clear in every subject. They know everything and even attended every lecture in class throughout the year but still, there is always something that scares them. Actually, this is what we actually call Exam phobia, and this is common for almost every student. In this article, along with previous year papers, I am going to help you to overcome this phobia. Get, set, and go with your preparations. I am sure, you will definitely feel contented once you read this article. I am sure you know the benefits of practicing previous years papers, but if you have any doubts then maybe these pieces of advice from toppers would clear your doubts. You will be glad to know that the students are going to answer your different queries, and at the same time, they will share their exam experience. Last year I passed class 10th with At the time of preparation, it looked near to impossible to score such good marks, and frankly speaking, I was so distressed in the last four months. One day, my friend visited my house having previous year papers in his hand. He was returning from his tuition classes. He realized my condition and suggested me to study from previous year papers. I started with all my heart, and within two months I was having a satisfying experience, and I continued the same way. Today, I am really very thankful to my friend. Practicing previous year papers proved to be a lifesaver for me. Yes, believe me, things got so much easy for me. From the very beginning, I was a studious student but despite the fact, I was feeling a bit nervous as the exams were coming near. In the last 3 months. Thanks to my teachers and parents who helped me a lot. I hope, it would help you to decide how much previous year papers are beneficial for you. I think, you should give it a try. I have tried to cover 10 previous year papers of all the subjects, but some papers may be missing because they were not available on the internet. Our team is up to the task, the missing papers will be uploaded soon. Concentrate on every subject equally and you will surely score good marks. And do not forget to go through the previous year papers that you will download from here.

**English – The Scoring Subject** Since English is a language subject, therefore it is easy to prepare and hence, students end up caring less about this subject. But, this is a wrong approach if you want to score good percentage in board exam. Subjects like English and Hindi should be considered as the marks boosting subjects. Instead, you should prepare it the best way you can. While practicing English, make sure you practice the grammar part well. Memorize the format of the writing section like letters, notice etc. In writing section half of the marks are for formatting, and try to keep you content meaningful. Focus more on quality than quantity. The best way to practice maths is to keep your basics clear. Before you start practicing any chapter, try to keep the basic concepts of that chapter clear, then only you will be able to really master that chapter. Formulas of that particular chapter should be on your fingertips. You can note the important formulas and questions in a separate diary so that it become easier for you to revise them, whenever you want. To score good marks in science, you will need to practice each and every part equally good. But if you find any part hard then you can skip it, but then you will need to prepare the other two parts very well.

**Social Studies – Not So Boring** Most students find Social science boring subject, but they should know that it can be really scoring subject as it is mostly theory based subject. You can write long answers by simply memorizing small terms and points i. You can make a separate notebook and write important terms and points in that notebook. This will help at the time of revision.

**Hindi – Source Of Percentage** Hindi is, of course, the easiest of all subjects, and that is why students leave it for the last day. But they forget that Hindi can prove to be such a good source of percentage. Not that you should spend hours studying Hindi, but, at least, give it some time, so that you are well prepared to score maximum marks in this subject.

### Chapter 4 : CBSE Class X Sample Papers - Mathematics & Science | Online Test

*CBSE has released the datesheet for Class 10 Board Exams So, students who are going to appear for the exam should start doing a rigorous preparation. During these days before the exam.*

Sample Paper 9 Hello! If you want to know the CBSE evaluation process and how the board exam copies are checked, then simply click on the link given. And maybe this is one of the reasons why people tell you to be serious about your board exams. Now you get the whole syllabus in two parts. Plus you get to choose which way you want to give your exams i. And still, I often find board students panicking. Just relax, there is no need to pump your heart rates. I believe that exams are never easy for those who are habitual to one-night fight, they generally keep things for the last day, and if you have this tendency too, then I can understand your situation. For those of you who are well prepared for the board exams, you can download the sample papers that are given above and make your preparation rock solid, and those of you who are yet to start, they can too download the class 10th new model paper for all subjects and begin from here. But make sure you have a pdf reader to open the given pdf. If you are having difficulties download the pdf files, then please let us know by commenting on the comment box below. Our team will respond as soon as possible. Now if you have downloaded the sample papers successfully then I suggest you start practicing them. I am sure you are aware of the benefits of practicing the sample paper and other practice papers. Usefulness of Sample Papers Sample papers are very useful because, first of all, they give you the idea about the pattern and format of the exam, secondly, you will be able to figure out the important questions chapter wise and, of course, the important topics. Basically, they totally prepare you for the exam. The more you practice sample papers the more comfortable you will be on the day of the exam, and trust me if you have practiced enough sample papers then you will get extra time. But if you do have a time of 2 or 3 months, then there are still chances that you can complete this mission impossible. Just take care of few things that are mentioned below. First of all, you need to get organized and clear your head. I know you will feel that repulsion from inside, but you have to do it. Maybe these tips will help. Environment and Good Habits You need to make an environment that will help you to stay focused, find a separate and a peaceful place where no one can disturb you. And stay away from that smartphone of yours, at least, when you are studying, or it will be the cause of your failure. Choose your study time very carefully, try to make a habit of studying at the dawn time of 4 to 7 Am or late nights. Basically, when you know no one will be around to disturb you. Improve your sleeping and eating habits, I know this sound very strange but trust me eating and sleeping habits plays a very important role. If you control them you will notice that your sluggishness will fall significantly. If possible, give some time for meditation. Just give 10 to 20 minutes daily and your focusing power will improve magically. And these are not just air bubbles, these techniques do work. Practical Time Schedule Next thing you should do is make a proper time table. Make a practical time table and follow it religiously with complete dedication. If you give only 1 or 2 hr to study then make a timetable in which you will give 3 or 3 and a half hr. Once you get comfortable with that timetable then add more hours to it. Give at least 25 minutes for revision every day. It will be time-consuming but as you know quality always wins over quantity. If you are having any doubts or problems regarding any topic then you should immediately clear them. Take help of your teachers, and if you are too shy to go to your teachers then ask someone else with better knowledge, but do not let any doubts clouding your mind. And finally, keep revising the previous chapters from time to time. Keep Sunday as a revision day, because if you are not in touch with the chapters you studied earlier, then you will find it difficult to recall them later.
