Development[edit] The Banglapedia project originated when the Asiatic Society of Bangladesh was working on a three-volume study titled History of Bangladesh, in The editors felt the need for a standard desk reference, as that project progressed laboriously, culling facts from various libraries. The idea finally led to a concept paper prepared by Sirajul Islam and his colleagues and submitted to the Asiatic Society of Bangladesh in early The Banglapedia project was formally adopted on 19 February , and Islam was appointed project director and chief editor. As the head of the Project Implementation Committee, his task was to plan and manage the project funding. Twenty-seven thousand entries were proposed, requiring a 20 volume compendium. Because of financial constraints, the number of entries was cut down to around 6, Banglapedia raised further contributions from universities, banks, multinational companies, international organisations and even private individuals. A total of 4, sets of the Bengali version and 2, of the English version were sold on the day of release. From October till November the book was printed by Felix Carey every month in page installments. Thus completed, the first part of Vidyarthabali was compiled into the page Vyabachchedvidya, the first book on anatomy and surgery in Bengali. Work on the second part, Smritishastra, which was largely on jurisprudence, then began. But, Carey died after only two page installments were printed in February and March The unfinished papers were compiled into four unequal volumes as Bangla Visvacos with Khan Bahadur Abdul Hakim as the chief editor. As it was written in Bengali and English, it was named Encyclopedia Bengaliensis. Articles on history, geography, mathematics and ethics related to Asia, Europe and America are included. The fourth volume was a history of Rome and the sixth volume a history of Egypt. Krishna Mohan hoped to write the history of India, but was unable to do so. Sample text excerpt from Banglapedia: The writing of each article was overseen by an expert editor. Its purpose is to provide a standard desk reference for Bangladeshis, as well as for people interested in Bangladesh, Bengali-speaking people, and related political, cultural and geographical contexts. However, for biographical entries, the linguistic identity prevails. There is a section explaining how to use the Banglapedia, which clarifies issues such as date systems, contributors, cross references, and headings. From ancient times to , the political geography of the region has changed often, and with that its name has also undergone changes. With the rise of Bangladesh as a sovereign nation state, the term has no doubt obtained a specific meaning. It may be noted here that the term Bangalah or Bengala, from which Bangla and Bengal originated, was coined and circulated by Muslim rulers whose seats of administration were located mostly within the present territory of Bangladesh. District and upazila cartography has been processed at the Geographic information system GIS and cartographic laboratory set up for the Banglapedia. The fact that around local intellectuals were charged with writing about their respective zilas and upazilas was described as a unique approach to information gathering. A professor of history at the University of Dhaka , the oldest and largest university in Bangladesh, Islam gave up his day job five years before the formal date for retirement, to make time for Banglapedia. Each sub-committee covered a particular discipline. There were six consulting editors, four language editors, and three translation editors. Each subject editor received assistance from six assistant and associate editors. Controversy[edit] Controversy over Banglapedia broke out even before publication, when the Inqilab group , a major Bangladeshi newspaper publishing house, got hold of a few entries on religion and related issues.

Bengali was an official court language of the Sultanate of Bengal. Muslim rulers promoted the literary development of Bengali. The modern literary form of Bengali was developed during the 19th and early 20th centuries based on the dialect spoken in the Nadia region , a west-central Bengali dialect. Bengali presents a strong case of diglossia , with the literary and standard form differing greatly from the colloquial speech of the regions that identify with the language. Linguist Suniti Kumar Chattopadhyay grouped these dialects into four large clusters Rarh , Banga , Kamarupa and Varendra ; [54] but many alternative grouping schemes have also been proposed. In the dialects prevalent in much of eastern and south-eastern Bangladesh Barisal , Chittagong , Dhaka and Sylhet Divisions of Bangladesh , many of the stops and affricates heard in West Bengal are pronounced as fricatives. The influence of Tibeto-Burman languages on the phonology of Eastern Bengali is seen through the lack of nasalized vowels and an alveolar articulation of what are categorised as the "cerebral" consonants as opposed to the postalveolar articulation of West Bengal. Rangpuri , Kharia Thar and Mal Paharia are closely related to Western Bengali dialects, but are typically classified as separate languages. Similarly, Hajong is considered a separate language, although it shares similarities to Northern Bengali dialects. What is accepted as the standard form today in both West Bengal and Bangladesh is based on the West-Central dialect of Nadia District , located next to the border of Bangladesh. However, use of Shadhubhasha in modern writing is uncommon, restricted to some official signs and documents in Bangladesh as well as for achieving particular literary effects. This form came into vogue towards the turn of the 19th century, promoted by the writings of Peary Chand Mitra Alaler Gharer Dulal , , [60] Pramatha Chaudhuri Sabujpatra, and in the later writings of Rabindranath Tagore.
