Check that the water supply valves are open. Lighting And Shutdown Instructions Do not alter any adjustments on this electronic control or gas valve. If adjustment is required, contact an authorized service center. Cleveland Range is in no way responsible for the operation or safety of this equipment if the controller, valve, or igniter probe are adjusted by anyone other than a Cleveland Range authorized service representative. Preheating The Steamer screen can reduce drainage from the cooking compartment resulting in reduced cooking performance, equipment damage, and a hazard to the operator. A blocked or slow drain may cause: The Electronic and mechanical timers use a temperature compensation circuit, which allows the timer to count down only while the cooking compartment is at cooking temperature. Keypad Timer Control Panel Note: Control panel for Gemini 10 Shown B. Cooking Operations " Keypad Timer Control Panel For safe, efficient operation of the steamer, the operator must, at a minimum, comply with all cautions, warnings and instructions in the detailed operating procedures and be familiar with the control panel shown in Figure Manual And Timed Modes Press keypad with fingertips only. Do not use kitchen utensils or anything sharp to operate the keypad. Control panel for Gemini 10 Shown 2. Manual and Timed Modes The steamer has two operating modes: Manual Mode The manual mode provides continuous steaming. The operator starts and stops steaming operations manually. Timed Mode and Use of the Timer 1. Instant On" Control Panel Press keypad with fingertips only. This will interrupt the production of steam without draining the steam generator. Set the required cooking time. Shortly after the door is closed, steam fills the cooking compartment. When the timer reaches zero, a buzzer will sound, the steam generator stops steaming, and steam flow to the cooking compartment gradually stops. Use a solid catch pan under perforated pans when steaming food that will drip juices. Failure to use a catch pan can cause a clogged drain. These give the best heat transfer and shortest cooking time. Blowdown Frequency is drained. Blowdown at frequent intervals helps decrease mineral buildup in the steam generators, and reduces the frequency of descaling and other maintenance. Blowdown Frequency The supply water quality determines how often blowdown must be performed. The more the steamer is used and the higher the content of total dissolved solids and particulates in the feed water, the more frequently blowdown must be performed. Do not open the steamer door before steam flow stops. Stand back when opening the compartment door. Open the door slightly to allow steam to vent before looking or reaching into cooking compartment. Do not reach into cooking compartment until the steam has cleared. Chapter 6 Preventative Maintenance And Troubleshooting 6. Replace the cleaned slide racks. Wipe the exterior with a damp cloth only. Electrical components inside the unit will not function correctly if wet or damp. After cleaning, leave the steamer door open until the next steamer operation. This prevents compartment odor buildup and increases gasket life. No other system of steamer descaling should be used. This procedure will take approximately 1 hour and 30 minutes to complete. This entire procedure should be read and fully understood before beginning the actual descaling operation. Page 24 See notes 2 and 3. Descale steam generator with Cleveland Range approved descaler. The unit requires a minimum inlet pressure of 4. Page 25 weeks. Bad or improperly set descale timer 1. If problem is inside the steamer, call an authorized service representative. Proper installation of the steamer is the responsibility of the owner or installer. A qualified installer or technician should be contacted to correct the installation. Steam Cooking is an excellent way to prepare countless foods. With large and small quantities you will find cooking to be efficient, economical, fast and convenient. Food can never burn-pans will never boil over-there is no heavy lifting of water in pots-no scouring of containers-no waiting for boiling to start. Sizing Up Pan Capacity B. Serving Sizes " How Much? How to estimate portion size and number of servings from a standard steam table pan. It is not necessary to add water. Perforated pans are recommended. Cook meats and poultry in nested pans, as juices can be used for gravy, sauces, beef stock and soups. The portion size, thickness, grades, should be considered when selecting a timer setting for doneness. Steaming Tips -lobster -crab -shrimp D. Live Lobster and Crabs a.
