Chapter 2 : How to edit a pdf file? | Adobe Community

With the Acrobat Reader mobile app on your iPad, you can add and edit text â€" or reorder pages â€" in a PDF from anywhere. Work with powerful editing tools. With full-page editing, when you add new text to a page, existing paragraphs will adjust automatically.

How to use Adobe Acrobat to edit a PDF file Design studios often have to edit PDF documents in order to alter a document created by someone else, or to make a last minute change without having to return to the source files. This page explains how to make simple changes to text and objects using Adobe Acrobat. Advanced PDF Editing with Acrobat X Pro or Standard If you want to make more advanced changes to the content and layout of a PDF file, including text editing, image cropping and repositioning, there are two main ways to do it: One method to better edit PDF documents is to use Adobe Acrobat X Pro Pro or Standard which is a significant improvement over its predecessors when it comes to advanced editing tools. No longer consigned to an obscure sub-menu, the improved advanced editing tools make a much better job of text editing and repositioning the text actually wraps now! Links to the software for more information are below the video. This is an example of a simple business card created and opened in Adobe InDesign. All the elements on the page have been selected to give you an idea of how it is constructed. The logo top left is an Illustrator EPS file with the text converted to outlines. The red and yellow background boxes and white lines have been created and placed in InDesign. In short, this is a fairly typical, simple layout. Drag a small rectangle anywhere on the PDF document page and then double-click inside it. The Crop Pages Dialogue Box will open showing the precise position of the crop box you have just created. From the drop-down menu in the top left corner, select TrimBox. You can check its accuracy by looking at the Cropped Page Size values underneath the preview image. Make a note of or copy the Margin Control values and select CropBox from the menu. Please note - just clicking OK with TrimBox selected will not actually crop the file - you need to revert to CropBox first. Once there, enter or paste the trim values into the Margin Controls fields. In the Page Range area, select All or From The file will crop perfectly to the crop marks. Below, I have changed the word barclay to the word black. If you need to find out what font the text has been styled with, or if you need to change the typeface, select the text and then right click on it. This will open the Touchup Properties Dialogue Box which you can use to edit some aspects of the text: A Document Properties Dialogue Box will open. Click on the Fonts tab to see which typefaces have been embedded: Text alignment and tabbing are non-existent. Again, if you want to make radical changes to the content and layout of a PDF file, the best way to do it will be by using a combination of Acrobat, Illustrator, Photoshop and InDesign, depending on your requirements. However, if you need to make more comprehensive alterations, please read the second part of this article:

Chapter 3 : How to edit PDF - edit PDF files - Adobe Acrobat XI

The TouchUp Text Tool has been around since the days of Adobe Acrobat 6, and has been available on every Adobe Acrobat version ever since then (including inside the Standard, Pro and Suite versions of the suite of tools).

Spacing between words and characters Baseline adjustments Follow these steps: With the TouchUp Text tool, first click the row of text or select the words or characters you want to edit. Control-click the text to open the shortcut menu. The TouchUp Properties dialog box opens see Figure 2. Choose a font from the Font drop-down list. As you make adjustments, the changes are previewed automatically in the selected text. Click Close to apply the settings. Tips for Tranquil Text Tweaking Keep these notes in mind when touching up text: If you need to select an entire paragraph, use the shortcut key combination Ctrl-A Mac: Option-click within the document where you want to add the text. The New Text Font dialog box opens with the default options set Arial text and horizontal writing mode. Select the font and writing mode you want, and click OK. The default text "New Text" appears on the page. Select it, and then type the new text. Click outside the new line of text to finish the process. Only fonts with a vertical writing mode will write vertically. TIP In addition to adding text, you can add line breaks. Click the location on the text block where you want it to break, and then right-click Mac: Control-click to open the shortcut menu. Then press Enter Mac: Return to wrap the text to the next line. You can use the same method to insert other items, including soft hyphens, nonbreaking spaces, and em dashes.
