

Chapter 1 : Dining room - Wikipedia

Connection. The dining room opens to the newly-renovated kitchen. Butler's Pantry. The blue-grey butler's pantry, painted in Benjamin Moore Solitude AF, features beverage and wine refrigerators and beautiful glass front cabinetry.

Clever Solutions A combined or visually blended kitchen and dining area with cohesive decor throughout avoids a disjointed and awkward vibe as you move from one space to the other. Flooring One of the best ways to give two spaces consistent flow is with cohesive flooring. If you like the dining room floor, install the same material in the kitchen. Getting a perfect match, however, can be a challenge. Easy-to-clean porcelain or ceramic tiles can provide a rich atmosphere that works in a busy kitchen and a formal dining room. For the tighter budget, a couple of good-looking rugs can help to tie in two spaces no matter what type of flooring lies beneath; if the dining area is painted a pretty shade of goldenrod and the kitchen boasts bright white cabinetry, for example, purchase matching rugs, strewn with sunny yellow and crisp white accents, in the appropriate sizes to place in front of the kitchen sink and under the dining table. Furniture Furnishings can bring unity to conjoined spaces. When the time comes to update kitchen cabinetry, take inspiration from dining room furnishings that you plan to use for years to come. If the suite and cabinetry are dark in color, choose light countertops for contrast, but if the furnishings are pale, go with a deep-colored work surface to add balance and interest and to avoid a monotonous or overly repetitive setting. Fabric When sitting down to dine with guests, an unappealing kitchen within view of the formal dining room can be an embarrassment. Fabric can be the peacemaker or equalizing factor when it comes to cohesive decor. Take a look around your dining room to discover which fabrics speak to your inner designer. Carry a garden medley print, for example, from dining room drapes to the kitchen as a window topper. Buy a couple extra place mats for setting under a plant or fruit bowl on the counter. Color The least expensive way to join or combine two spaces is with paint. Bright colors add life to any space, while deep or dark colors lend soul-soothing earthiness. If the budget allows, wallpaper -- adored by interior designers for its variety of patterns, textures and colors -- offers prints from classic paisley to modern, intricate geometrics. And when flowing from one room to the next, the right paper can beautifully connect two spaces. Enhance the flow with an elegant crown molding framing the entire combined space. Decor Artwork, ornaments and table settings should communicate or speak the same design language to synchronize two areas. Carry crystal or silver from the candlesticks on the table to the fruit bowl on the counter. Include a take on the vineyard landscape artwork that might overlook the table, with color-coordinating ceramic tiles featuring dangling bunches of grapes to neatly line the top of cupboards or to set on plate stands atop the island or counter.

Chapter 2 : Simple and Classic Christmas Kitchen and Dining Room

A benefit of having your dining room located in your kitchen is the ability to utilize built-in features for both storage and dining. These cabinets along the wall provide counter space to function as a dining room buffet and as kitchen storage and work space.

This was a large multi-function room capable of seating the bulk of the population of the house. The family would sit at the head table on a raised dais , with the rest of the population arrayed in order of diminishing rank away from them. Tables in the great hall would tend to be long trestle tables with benches. The sheer number of people in a Great Hall meant it would probably have had a busy, bustling atmosphere. Suggestions that it would also have been quite smelly and smoky are probably, by the standards of the time, unfounded. These rooms had large chimneys and high ceilings and there would have been a free flow of air through the numerous door and window openings. Over time, the nobility took more of their meals in the parlour , and the parlour became, functionally, a dining room or was split into two separate rooms. It also migrated farther from the Great Hall, often accessed via grand ceremonial staircases from the dais in the Great Hall. Eventually dining in the Great Hall became something that was done primarily on special occasions. Toward the beginning of the 18th Century, a pattern emerged where the ladies of the house would withdraw after dinner from the dining room to the drawing room. The gentlemen would remain in the dining room having drinks. The dining room tended to take on a more masculine tenor as a result. Contemporary usage[edit] Example of a modern-day dining room from the United States. A typical North American dining room will contain a table with chairs arranged along the sides and ends of the table, as well as other pieces of furniture such as sideboards and china cabinets , as space permits. Although the "typical" family dining experience is at a wooden table or some sort of kitchen area, some choose to make their dining rooms more comfortable by using couches or comfortable chairs. In modern American and Canadian homes, the dining room is typically adjacent to the living room, being increasingly used only for formal dining with guests or on special occasions. For informal daily meals, most medium size houses and larger will have a space adjacent to the kitchen where table and chairs can be placed, larger spaces are often known as a dinette while a smaller one is called a breakfast nook. If a home lacks a dinette, breakfast nook, or breakfast bar, then the kitchen or family room will be used for day-to-day eating. This[clarification needed] was traditionally the case in Britain , where the dining room would for many families be used only on Sundays, other meals being eaten in the kitchen. In Australia, the use of a dining room is still prevalent, yet not an essential part of modern home design. For most, it is considered a space to be used during formal occasions or celebrations. Smaller homes, akin to the USA and Canada, use a breakfast bar or table placed within the confines of a kitchen or living space for meals.
