Sep 13, True Reader rated it really liked it First and foremost, I am not one for vampire novels. Vampires on the silver screen, or even the TV, I can deal with. Ding, got my costume for this year. Books that have death as the most dire of consequences do not typically agree with me, as death seems to be the most natural of occurrences once you make friends with that dreadful thing I mentioned before—mortality, and so vampire syndrome—the want to live forever and have airbrushed, yet chiseled abs, bores me to no end. But *The Gilda Stories* takes a much different approach. Indeed, though the protagonist, and her friends are vampires, this is only a cunning construct the author uses to tell a much bigger story. Deep down *The Gilda Stories* is about who we call family and why, where we call home and how we find it, how to constantly feel like an outsider and still be yourself. The vampire aspect of this book is secondary, Gomez only uses it as a way for her protagonist to live forever. Yes, Gilda is a vampire, and so immortal, set apart from humans, but she is nevertheless connected to humans in a more intimate manner than humans are connected to each other. The structure of this novel is quite intriguing. There are 8 chapters, each taking place in a different year. The first chapter is in , the last The way Gilda and her friends change with the times is skillfully written, and serves as a mirror, a way for us to look at ourselves. I can imagine that it would be easy to read the back cover of this book and dismiss it as escapist fantasy. But that would be a poor assessment of this novel. The issues it deals with are serious issues. Ones that do not let the reader escape from their lives, but makes them think about our cultures from the past, present, future. Who will we become? Do we have the power to shape it ourselves? In fact it may turn some of the Vampire Faithful off because the plot is based in humanity, not the creatures of the night. Look for it in your independent bookstore before going to the internet!
