

**Chapter 1 : Turning point of the American Civil War - Wikipedia**

*In The Wall Street Journal, Robert M. McDowell writes that as regulators weigh imposing net neutrality on the Web, Congress tries to pre-empt government overreach.*

McDowell The Federal Communications Commission is about to answer the most important question in its year history: Does the agency intend to protect the open Internet, or is it lunging to seize unlimited power over the Web? Meanwhile, the new Congress is maneuvering to change the net-neutrality equation, with hearings in the House and Senate beginning Wednesday. Even congressional supporters of net neutrality, wary of increasing FCC power over something as vast and crucial as the Internet, are working to draft an alternative. At the end of this constitutional process, all sides may be able to claim victory. For years Washington has debated how to keep the Internet open and free from government or private coercion. Regulation proponents have argued that new rules are needed to prevent Internet service providers, such as phone, wireless and cable companies, from blocking or degrading the online content or applications consumers want. Though no market failure exists, and regulators have never conducted a study to diagnose the alleged potential illness, the FCC has twice tried to impose new rules on the Web. Each time it lost in court. The tragedy of this debate is that no one, including phone, wireless and cable companies, has ever contested the goals of keeping the Internet open. It has been open and freedom-enhancing since it was privatized in the mids because it is protected under existing antitrust and consumer-protection laws. Instead, the fight has been over how much regulatory power the FCC should wield. In November President Obama called for this embrace of Title IIâ€”a radical departure from Clinton-era light-touch policies and a clear loser for the Internet and consumers. Brand X Internet Services. Although the legislative process can be perilous, Congress can provide all sides with a way out. Net-neutrality supporters could achieve their long-sought goals of restating protections for consumers and tech startups; doubly ensuring that Internet service providers could not unlawfully block or throttle content and applications or impose anticompetitive prioritization requirements; and creating congressionally defined enforcement authority for the FCC. They could also enjoy, for the first time, the certainty that a court cannot hand them another loss. This would also send a strong signal to foreign governments and international regulatory bodies that they should not smother the Web with antiquated rules designed in an era when people held their phones with two hands. The FCC stands at a fork in the road. If the agency rushes down the Title II lane, it will own the consequencesâ€”decreased investment in the Internet, a hobbled tech sector and new taxes and fees on consumers. Running in this direction would reveal that having unlimited power over the Internet economy was what the FCC wanted all along. If the agency takes a different path, however, the FCC can attain its stated policy goals, be protected by legislative certainty, and bask in the glow of achieving statesmanlike bipartisan consensus.

Slave territories contested Confederate invasion of Kentucky September [ edit ] By mid, eleven states had seceded, but four more slave-owning " border states " remained in the Union— Missouri , Kentucky , Maryland , and Delaware. Kentucky was considered the most at risk; the state legislature had declared neutrality in the dispute, which was seen as a moderately pro-Confederate stance. The loss of Kentucky might have been catastrophic because of its control of the strategic Tennessee and Ohio rivers and its position from which the vital state of Ohio could be invaded. Lincoln wrote, "I think to lose Kentucky is nearly the same as to lose the whole game. Polk followed this by moving through the Cumberland Gap and occupying parts of southeastern Kentucky. This violation of state neutrality enraged many of its citizens; the state legislature, overriding the veto of the governor, requested assistance from the federal government. Kentucky was never again a safe area of operation for Confederate forces. Thus, almost by accident, the Confederacy was placed at an enormous strategic disadvantage. Union assault on Confederate entrenchments at the Battle of Fort Donelson Union capture of Forts Henry and Donelson February [ edit ] The capture of Forts Henry and Donelson , and the Confederate surrender at the latter, were the first significant Union victories during the war and the start of a mostly successful campaign in the Western Theater. Grant completed both actions by February 16, , and by doing so, opened the Tennessee and Cumberland Rivers as Union supply lines and avenues of invasion to Tennessee, Mississippi , and eventually Georgia. The loss of control of these rivers was a significant strategic defeat for the Confederacy. This was the start of offensive actions by Grant that, with the sole exception of the Battle of Shiloh , would continue for the rest of the war. By , he commanded all Confederate forces between the Cumberland Gap and Arkansas. The Confederate government failed to meet these recommendations. Grant captured the forts in February and launched a full-scale invasion of Tennessee. The fall of these forts was inaccurately blamed on Johnston, but he continued to serve. He launched his attack at the Battle of Shiloh in April He assigned Beauregard to coordinate the attack. Beauregard disagreed with his strategy and instead planned to drive the enemy back toward the river. On the first day of battle, Johnston personally led the attack on the enemy. He was a victim of friendly fire, receiving a hit in the knee which severed his popliteal artery. Johnston died within an hour. His death resulted in critical reassignments of his command to less talented generals who failed to repair the virtually doomed Western Theater. Philip , New Orleans had no means to oppose capture. Although the occupation under Maj. Benjamin Butler was detested, he was astute enough to build a base of political support among the poorer classes and create an extensive intelligence and counterespionage capability, nullifying the threat of insurrection. But it also had two strategic consequences. Although considered a tactical draw between the Army of the Potomac and the much smaller Army of Northern Virginia , it marked the end of Robert E. One of his goals was to entice the slave-holding state of Maryland to join the Confederacy, or at least recruit soldiers there. He failed in that objective; he also failed in marshaling Northern fears and opinions to pressure a settlement to the war. He had been counseled by his cabinet to keep this action confidential until a Union battlefield victory could be announced, lest it appear to be an act of desperation. Along with its immense effect on American history and race relations, the Emancipation Proclamation effectively prevented the British Empire from recognizing the Confederacy as a legitimate government. The British public had strong anti-slavery beliefs and would not have tolerated joining the pro-slavery side of a fight where slavery was now a prominent issue. Support from France was still a possibility, but it never came to pass. Stonewall Jackson to pneumonia following a friendly fire accident. His death was a blow to the morale of the Confederate army, as he was one of its most popular and successful commanders. Two months later, Robert E. Lee himself shared this belief [6] and is said to have told his subordinate generals on different occasions that they should have acted like Jackson would have. Union capture of Vicksburg and victory at Gettysburg July [ edit ] A Union battalion scales the defenses of Vicksburg in a costly failed assault ordered by Grant early in the siege On July 4, , the most important

Confederate stronghold on the Mississippi River at Vicksburg, Mississippi surrendered to General Ulysses S. The previous day, Maj. George Meade had decisively defeated Robert E. Lee at Gettysburg, Pennsylvania. These nearly simultaneous battles are the events most often cited as the ultimate turning points of the entire war. As President Lincoln had stated, "See what a lot of land these fellows hold, of which Vicksburg is the key! The war can never be brought to a close until that key is in our pocket We can take all the northern ports of the Confederacy and they can defy us from Vicksburg. The three-day battle witnessed the Union Army of the Potomac decisively repel his second invasion of the North and inflicted serious casualties on his Army of Northern Virginia. From this point onward, Lee attempted no more strategic offensives. Although two more years of fighting and a new, more aggressive general-in-chief Grant was required to fully subdue the rebellion, the eventual end at Appomattox Court House in seems inevitable in hindsight. While Gettysburg was seen by military and civilian observers at the time as a great battle, those in the North had little idea that two more bloody years would be required to finish the war. News of the severity of the two rebel defeats led to a sell-off in Confederate bonds. By the end of , the probability of a Southern victory fell to about 15 percent. Leaving Sherman in command of forces in the Western Theater , he moved his headquarters east to Virginia. Previous Union commanders in the critical Eastern Theater had not mounted effective campaigns, or successful pursuits of Confederate forces after gaining rare victories. Grant devised a coordinated strategy that would strike at the Confederacy from multiple directions: The capture of Atlanta, following a tedious and frustrating campaign, lifted the spirits of Unionists and came just in time to build the popular support necessary to re-elect Lincoln, in addition to its military result of crippling transportation in the heart of the Confederacy and nearly destroying the city. McClellan , ran on a Democratic Party platform that favored a negotiated settlement with the Confederacy. Although McClellan disavowed this platform, the South would have likely seen his election as a strategic victory.

*Turning Point with Dr. David Jeremiah, San Diego, CA. M likes. Turning Point is the broadcast ministry of Dr. David Jeremiah Josh D. McDowell (Ministry).*

But as persons of interest surfaced and a crucial clue was uncovered, there was still no sign of McDowell -- did someone know where she was? Correspondent Maureen Maher investigates. It just would not stop. One of our investigators lost his entire house. Our local Texas Ranger and his wife were flooded out of theirs. And yet, they showed up for work. All day looking for this woman. Investigators search for Crystal McDowell D. But weather was not their only challenge. If Crystal had met with foul play, the sheriff says there was a growing list of people to question. She was extremely social. She had lots of friends. Jeff Walters [in tears]: And our main objective is just to get Crystal back home. He was the person that was extremely emotional and reported her missing, but then he kept getting in the way of the investigation. This is not a game to us. This is not a hobby. This is what we do. Also on the list, the men romantically linked to Crystal. In June , the couple went through what many described as an amicable divorce after 10 years of marriage and two children: And what was his story for Friday morning? That she never showed up. That she was supposed to show up and she never did. That morning, at 7: Do you have water? Looks like I may stay here with the kids. It seems just like rain. What did he tell authorities about their marriage, their relationship? In fact, Crystal was living with Steve and the kids, in a house she helped him buy, while her townhouse was being renovated. She was living in the master bedroom downstairs and he had moved into a bedroom upstairs. He had such a passionate love for her. It was almost unhealthy. If she wanted her hair brushed, he would brush her hair. Is it fair to say that she wore the pants in the family? But over time they grew apart. And Steve was OK with just stepping back being the house person. He was the dad. She was more of the provider. She was his life, and they were his life. He was very cooperative with us. Hargrave owned a local jewelry store and had been dating Crystal for a few weeks. She seemed in love with him -- They seemed perfect together. We had talked about going to Europe. She got a ticket to go with me to Belgium next month. Investigators would learn Crystal had also invited Paul to go on a family cruise. Steve, her ex-husband, was going too. And I told her, "Well, gosh, I would love to go -- But I think it will be awkward for me to be there with the ex husband. She had stressed to me that he was pretty upset about that. Which is why, Hargrave said, he was deeply concerned when Crystal disappeared after she left his home in her black Mercedes, which was also missing. What do you think happened to her? I just am trying to focus on, on finding her. But Sheriff Hawthorne says he became suspicious after Hargrave failed to tell authorities about security footage from his home showing the last time Crystal was seen alive. She actually walked right through this living room at 7: I think she was seen leaving the driveway at 7: Paul Hargrave shared the tapes -- not with investigators, but with the media. Intentional or oversight on his part? Some of the investigators that were involved in this would say, "You know, I think its Steve. I will give the family credit for finding that vehicle. So now they knew where the car was, but who put it there and what would they find inside? Weather and time deteriorate evidence, physical evidence. Well you could get in the car because it was unlocked and the keys were sitting on the console. Did that strike you as odd? Set up for someone to take it? But whoever had left the car there to be taken, did not anticipate the massive flooding in the aftermath of Hurricane Harvey. The water had risen. And that was finally a break in your direction. A lot of their majors and captains and sergeants and investigators homes were going underwater -- it was chaos for everybody. There are a lot of moving parts right now. The investigation had taken a toll on D. Lieck, who had lost all hope. Paul Hargrave meets with investigators D. There has been no activity on any of her credit cards, debit cards, nothing. Nobody leaves anymore without a cell phone. Sheriff Hawthorne, deputies and Texas Rangers expanded their focus from finding Crystal -- to finding her killer. As of about midnight last night the net has widened and its husband, boyfriend, uncle. Early in the investigation, the top persons of interest had been brought in for questioning. Paul Hargrave [to investigator]: She was really concerned about her well-being. Did you have anything to do with the disappearance of Crystal? Jeff Walters [to investigator]: He reminds me of Hannibal Lecter and he creeps me out really bad. And Steve stuck with his story that Crystal never showed

up at his house. And how did they do? Focusing on the location of the car, deputies began gathering video from nearby businesses. A camera at a Shell gas station next door to the motel appears to have captured one of their three persons of interest. Jeff Walters is questioned by investigators D. Like a bag or? It looked like clothing is what it looked like. We recovered the trash can and the problem is all the contents had floated out of it. Because of the hurricane. Because of the storm. Then investigators receive different security video showing Steve McDowell in action -- right in the Motel 6 parking lot. You just see somebody park the car. And what does that say to you? It says that my person of interest has changed [laughs]. The videos are purely circumstantial evidence. But for the first time, investigators are all heading in the same direction. Inside the war room: I said, "Cindy, I need you to stay close to Steve.
