This guide will give you an overview of the new stuff you can use in-game, and link to in-depth articles about each new gameplay element. Console players do not get horses, nor small animals like lizards, snakes, and rodents, but most other information should be pretty close. If you want a deeper experience, keep an eye out for a good multi-expansion pack bundle in the future. If you are a Sims 3 console player, we do have a section on our forum where you can connect with each other, click: Our boards support Wii as well, but this Expansion only made it to one nintendo console -- the 3DS. Create-a-Pet Create-a-Pet is a powerful tool that allows for creation of the the new pet types aside from minor Pets like chinchillas. The game comes with many set breed patterns, and most types of animal coat are covered. You are limited to adults during Pet creation. Sims Additions Sims get a couple pet-related traits, and six new Lifetime Wishes related to the animals. They relate to befriending cats and dogs, making money with horses, collecting animals, and adopting strays. Aside from this, they get interactions with the Pets, some new clothes, and a couple Pet-related LTRs. The Pets There are four categories of Pets you can adopt or find. Dogs, Cats, Horses, and Small Animals are all offered in the game. Getting the large Pets requires only that you adopt them with a phone or computer. Small Pets need to be found in the wild by a Sim or Cat. Life and Death Large Pets can breed, provided they know each other well enough. This will result in a Puppy, Kitten, or Foal. Pets will grow old and die, and can return as ghosts and playable ghosts. You can have ghost kittens using a similar method to making Ghost Babies requiring live female, ghost male. They can also be resurrected at the Science Facility in town. Fear not, your pets can live on just like your Sims. Thanks to Jena and Alex for sending me shots of this, saving me the trouble of testing it myself. Ambrosia does work for Pets, and can be done just like a Ghost. As follows, with the tip provided by dolphinlover on Youtube click to see a video of this process: Have Sim make Ambrosia 2. The only cause of death that can claim an animal is old age. Although dogs can swim, they do not drown. Animals who are happy and have achieved 10, lifetime points will be nice, blue ghosts. A pet that acieved less than that ill come back as a red ghost.. Dogs Dogs have a need for destruction. Even the most well-behaved dog will want to tear something up once in a while. Cats Cats can collect small animals for your Sim with their version of the hunting skill. Thankfully, you can get them a scratching post. If not, the alternative is probably the couch. Horses Horses are the most fully-featured pet available. They offer a sick new way of making money in racing, but particularly breeding, training, and selling horses. Studs even get paid. Minor Pets Pets adds several new categories of minor pet that can be found by Sims or caught with a Cat. They are birds, lizards, rodents, turtles, and snakes. You can learn all about them and see lists and prices in the minor pets guide linked above. Befriending Wildlife Sims can befriend wildlife, and even get better at doing so. You can see deer and Racoons, but the main targets to befriend will be the new wild horses. Unicorns Unicorns are the new form of life in The Sims 3 Pets. They can bless and curse Sims and Pets alike, and cause plants to grow or die using their magical reserves. They run super fast when mounted, to boot. That is, if your Sim can handle it. Learn about how to get Unicorns and more in our guide. Just like Sims, Pets accumulate Lifetime Happiness points from being happy. They can spend them on LTRs, some of which are unique. And Of Course New Objects There are not very many new object types however. Cats get litter boxes, there are animal houses and horses get all the things a horse would need to be comfy and train for racing. All in all, this is a sturdy expansion pack but nothing yet can really compete with Ambitions for me. Are you sure you want to report it?
