TIFF preview: giving women's stories a Mouthpiece How an experimental Toronto play, which no one - including movie star Jodie Foster (!) - ever thought would make a movie, became one of the.

I think we often forget this factâ€”subjectively rather than objectively. We also know how much they cared for the other despite overreactions and hyperbolic grandstanding. But sometimes we mess up. Sometimes we get drunk and lay it all out in a very public fashion at Christmas without having a chance to apologize before the call arrives to explain we never will. I mean two actors play her simultaneously: One is recklessly impulsive, the other a more responsible dreamer. A lot of how it unfolds onscreen is theatrical in that way too, but Rozema does a great job adapting things to the needs of a cinematic medium. She keeps them close, but not always together. While they ride her bike on two seats one with helmet, the other without, they can also find themselves watching the other make a fool of herself or speak a necessary truthâ€”as much an attentive audience member as ourselves. She also retreats to the darkest recesses of her soul when emotions run too high to control, images of her drowning and gasping for air to find a voice untainted by self-destruction and self-hate. The two halves of her current form mock each other and embrace themselves in equal measure, everything happening so fast that she can hardly process her pain let alone push it aside to write the eulogy no one wants her to write. They want to shield this memorial from the hostility that sadly appeared more often than the love they know resided beneath it. But Cassandra needs the catharsis. She needs to work through her rage and blame and insecurities to both honor this woman who proves herself in memory to be worthy of it and also figure out how to compromise her two selves: Discovering the middle ground is a journey of hurt. Nostbakken and Sadava have stripped away the artifice to get at the root of the problemâ€”thoughts made flesh. A sex scene becomes a joint conversation about the thoughts Cassandra hoped the act would silence. She exorcises the bile, letting every unfair yet not wholly untrue thought trigger a scene from the past that proves more complex than knee-jerk indignation allowed. Eventually the rhythmic breathing-infused score will slow from anxiety-inducing staccato to a well-earned soothing calm. Mouthpiece screened at the Toronto International Film Festival.

This short crime suspense tale brings to mind the gangster films of the 30s starring Humphrey Bogart, James Cagney and George Raft. It was the era of J. Mouthpiece is short, but satisfying. Mouthpiece also features three other great crime suspense stories from golden age. The second story, Flame City, involves a certain Detective-Sergeant Tom Delaney and his investigation into some mysterious fires. In the third story, Calling Squad Cars, police radio operator Jim Collins is framed by gangsters and sets out to clear his name. Collins is a typical Hubbard hero. Collins uses both his fists and his wits to good effect. The final entry, The Grease Spot, is about a mechanic named Bill Milan who picks up car crash reports via radio and drives to the crash scene to offer his services as a way of making money. The ensuing action is thick with tension as Milan struggles valiantly to turn the tables on a gangster named Carbonelli. Mouthpiece is another gem readers will want to pick up fast. Setting Mat up with a couple gunmen for a ride to visit the mobster, Mat is taken for a ride instead. Turning the tab This volume contains four stories: Turning the tables on the gunslingers, he figures out the real facts, and forces the mouthpiece to admit that he was the murderer. His son, Detective-sergeant Tom Delaney rides with him to the latest fire scene and discovers evidence that gets him waylaid by two hoodlums. Escaping the burning building, he rounds up the hoods, and then goes after the gang boss, stopping an insurance fraud that has resulted in several deaths. The insurance company is happy with the fire chief and offers to fit the station with brand new equipment, and the chief has his job secured once more. While the crooks eat in another room, Collins sets up the radio and brings the police down on the bad guys. With a police band radio set up in the shop, and Bill an ex-racer, he always beats the police and other wreckers to scenes of accidents and is hired for his service on the spot. Four good stories, each plot different, and each a fun read. Hubbard was an excellent writer, and could spin a good yarn, regardless of the genre. This is fast paced, with plenty of action, and with interesting characters.
