Alan: That's the way the ball bounces. I was planning to have fun on my vacation, but I've been sick the whole time. I guess that's just the way the cookie crumbles.

Sign Up for E-News We both looked down at the dog who had been following us from room to room with a bright yellow tennis ball clenched in his mouth. He took the ball from the dog and threw it out the back door. The dog bolted out the door like he was shot out of a cannon, got the ball, and then came back and waited. My husband threw the ball again. The dog had a problem. At first it was one ball toss a day. Now he needed a dozen tosses or more to get the same tennis ball rush. At some point he crossed the line from fetch enthusiast to full-blown fetchaholic. When he was a puppy, he had many interests: But over the years, he slowly lost interest in all the other toys and became obsessed with the ball. He had red balls, orange balls and purple balls. There were rubber balls, fuzzy balls and balls with holes in the middle. He had balls that floated and balls that glowed in the dark. Open, and he loved them all. Yes, I knew we had enabled him in his addiction someone had to buy him all those balls , but the obsession was his alone. Even with all his own balls, he has been known to steal balls off the lawns of other, less fortunate dogs. The day he grabbed a ball out of the mouth of a mere puppy, I knew it was time. I decided to do some research and see what I could find to help our poor, fetch-addicted pooch. I figured this must be a common problem for a breed that is born to retrieve. Clearly, there would be multiple programs for the four-legged, the furry and the fetch-obsessed. I looked online and found a number of sites for dogs with chew toy addictions, but nothing on tennis balls. He could go through ball withdrawal. Chew up our socks. As we went in, the dog seemed to get a whiff of something that sent him into a frenzy. Suddenly I noticed a promotional table set up by the desk with some literature and some dog toys.
