Chapter 1 : The Advocate College Guide for LGBT Students (è±†ç“£)

The Advocate College Guide for LGBT Students is the best ever road map to gay-friendly campuses. Even if we do say so ourselves.

Are sexual orientation and gender identity included in the non-discrimination policy? The City of Ithaca also prohibits discrimination on the basis of sexual orientation and gender identity, and includes both in its hate crimes law too. Surrounding Tompkins County also includes sexual orientation and gender identity in its nondiscrimination law. The State of New York prohibits discrimination based on sexual orientation in employment, public accommodation, education, housing, and credit. Is there an active LGBT student organization? Several student groups have also gone above and beyond to reach out a hand to LGBTQ students not just on campus, but throughout the nation. The response to their call for participants was so overwhelming that they created four different It Gets Better videos – find them on YouTube or itgetsbetter. How does the school respond to such incidents? Concerns or complaints may be brought to the Office of Public Safety. The staff in the Center for Counseling and Psychological Services are very supportive. They also periodically provide specific programs and services for LGBTQ and questioning students, such as coming out groups and stress-management workshops for LGBTQ and allied students. Are supportive faculty and staff easily identifiable? There is an active Safe Place project on campus that involves the public display of signs along with resources available to support LGBTQ students. What about transgender students? Designate your chosen preferred name on college records, request housing that meets your specific needs, find a map of gender friendly restrooms, learn how to legally change your name or gender marker on identity documents, get prescription coverage for hormone therapy – we even have a specialized Voice and Communication Modification Program offered by our campus Speech Pathology program. All this and more are in place to serve transgender students. There are lots of places and ways you can meet a roommate. If you are looking to find someone you can check out HomerConnect by using your housing profile, IC peers, orientation, your class Facebook account, and more. Does the school offer domestic partner benefits? Domestic partner benefits, such as health insurance, are available for partners of faculty and staff. Does the campus and surrounding community feel safe and welcoming? According to US Census data, Tompkins County ranks among the top 20 counties in the nation with the highest percentage of gay and lesbian people reporting they lived in a same-sex partnership household. As always, the best way to find out about the campus and community is to visit for yourself. Contact the Admission office to arrange a visit. So, what is a ZAP Panel anyway? A ZAP panel is a specific type of educational program aimed at learning about the diversity of experiences of lesbian, gay, bisexual, transgender, and allied people. That learning takes place as panelists share their short personal stories about being an LGBT or allied person and provide an opportunity for the audience to ask questions. How do I host a Zap!? Please contact prism or the ZAP co-coordinators for more information: Email your question to Luca Maurer and it will be answered soon!

Chapter 2 : College Guide for LGBTQ Students | theinnatdunvilla.com

THE ADVOCATE COLLEGE GUIDE FOR LGBT STUDENTS is the product of nearly 5, online interviews with LGBT students and online interviews with faculty and staff from.

Campus Pride , the predominant national nonprofit organization serving LGBTQ students, functions as a primary resource for such a search. Each year, the site provides a comprehensive listing of the most LGBTQ-friendly colleges in the nation and hosts a college fair specifically geared toward LGBTQ youths and their families. Look for the [? In , the Consortium of Higher Education LGBT Resource Professionals joined with 25 other organizations to request that optional questions related to gender identity and sexual orientation be added to the Common Application used for admission at more than colleges in the US and internationally. The data would facilitate more accurate statistics pertaining to LGBT students, and could help administrators better track their admission, retention, and graduation rates. Fortunately, the growing acceptance of homosexuality in America is encouraging more students to come out before or during college. An increasing number of college campuses, resource centers, and social media sites use the seven-letter acronym in an effort to be more inclusive of all types of sexuality. People who are lesbians need not have had any sexual experience; it is the attraction that helps determine orientation. Gay The adjective used to describe people who are emotionally, romantically, or physically attracted to people of the same gender e. People who are gay need not have had any sexual experience; it is the attraction that helps determine orientation. It is the attraction that helps determine orientation. Queer Reappropriated from its earlier negative use, the term can be inclusive of the entire community, and by others who find it to be an appropriate term to describe their more fluid identities. Questioning A term used to describe those who are in a process of discovery and exploration about their sexual orientation, gender identity, gender expression, or a combination thereof. Intersex Individuals born with ambiguous genitalia or bodies that appear neither typically male nor female, often arising from chromosomal anomalies or ambiguous genitalia. Asexual An individual who does not experience sexual attraction. There is considerable diversity among the asexual community; each asexual person experiences things like relationships, attraction, and arousal somewhat differently. This can be the most amazing time of your life, when you get to freely explore who you are and the world around you. Your LGBTQ identity is just one facet of who you are, so look for opportunities outside of that one identity. Remember, coming out is a highly personal decision to each individual. Take it at your own pace, reach out to resources on campus, and go on your journey your way. Remember, FERPA applies as a student so talking to student affairs or counseling center employees is confidential and protected. Reach out to them if you need to talk or plan! Before you arrive on campus, read up on federal and state anti-discrimination laws and become familiar with campus ordinances. Additionally, national and regional organizations can provide helpful information and important resources. Check with the office of the Dean of Students, the student services center, or the on-campus counseling center at your school for guidance. Harassment Many LGBTQ students endure teasing or bullying in high school, and they may encounter similar or worse harassment in college. A recent survey by the Association of American Universities revealed that three in four LGBT students have experienced sexual harassment at least once. Isolation Loneliness is a common problem for LGBTQ students away from home for the first time, particularly for those disowned by their families or those who have not yet made new friends. Many students feel pressured to conceal their sexual orientation because of verbal threats, graffiti, or casual derogatory remarks. For many students, deciding whom to trust can be a source of stress. Getting involved in LGBTQ associations and activities on campus can help you feel more comfortable and make connections with others who can relate to your concerns. LGBTQ students unable to find a part-time job to support themselves while in college often struggle financially, and may even become homeless. Housing Discrimination In the U. However, as more colleges and universities expand their efforts to become LGBTQ-friendly, housing opportunities are rising commensurately. Housing directors on some campuses offer students a choice of

sharing dorm space with LGBTQ roommates, living in gender-neutral housing, or settling into a nearby campus apartment. Despite the hardships that LGBTQ students face on campus, the number of organizations offering positive support and access to valuable resources grows every year. Many universities have dedicated LGBTQ directors to help LGBTQ students qualify for financial aid, housing, and other programs that can make college not only possible, but also a positive experience. Ideally, you want to find a campus that can feel like home, but the work to become comfortable at school starts before you even submit your first application.

Campus Vibe One of the best ways to evaluate a college is to visit in person. Walk around the campus and surrounding area to get a feel for the vibe and decide whether you feel safe and welcomed. Do you see rainbow pride flags hanging from campus buildings? It may help to keep a few questions in mind: Inclusion Statements and Anti-Discrimination Policies Before applying to a school, it is important to review their student code of conduct. If a school would not hire someone identified as LGBTQ, you may not feel comfortable as a student there. In particular, mental health counseling services available at these centers can provide much-needed support to LGBTQ students struggling with various issues on campus. Campus Pride provides a list of colleges and universities with gender-neutral housing on or near campus. Some national organizations have regional chapters that can provide valuable information and contacts. Try to connect with a local group that offers opportunities to socialize and network. Campus Security Offices Developing familiarity with campus security personnel may help you feel safe. Ask for information on crimes against LGBTQ students, reports of discrimination, and what campus ordinances are in place to prohibit harassment. Be sure you know the location of security offices around campus, including blue-light emergency phones that are often in parking lots and other common areas. Local Law Enforcement Check with the local police department for information on crime rates and how they handle discrimination and harassment against LGBTQ students. Do they work closely with college security personnel? What are the three most important attributes or characteristics an LGBTQ student should consider when selecting a university experience and why? Are there safe space signs? Cultural fit is extremely important. Do these students feel supported and embraced, or merely tolerated? Tolerance is not enough. Potential students should be looking for a campus that has worked to cultivate a culture of affirmation. What has their experience been like? It was kind of funny, even at the time, but it would have been nice if even one attendee had known where my group was and had pointed me in the right direction. Darla Linville Assistant Professor, Augusta University, College of Education Obviously, a student needs to think about the program, major, and activities that they want to participate in at college. This is in some ways the first cut, but it is also important to find the right campus climate that will allow a student to thrive. For example, it is perhaps unwise to go to a great pre-med program at a very homophobic school, because swimming against hate will take too much energy. I think the most important elements would be: This is the place that students no matter their identity can come to get immersed in the discussions of sexuality and gender in our culture and get a better understanding of how these systems work to order and regulate all of us. This is not to say that there are not differences within these groups racism, religious divisions, class issues that can be divisive and exclusionary to students, but more and more students arrive in these groups with an understanding of intersectionality and how identities, privileges, and oppressions intersect. Students can ally with faculty in gender studies to advance the intersectional conversation if it is not already happening. These groups often ally with other groups on campus to create a broad base of knowledge and activism against various oppressions. These should provide gender neutral bathrooms and allow students to be housed in the correct dorm. They should also offer protections if a student experiences harassment, and a formal procedure through which to file a complaint. Religious Colleges Often, LGBTQ students are wary of religious schools that embrace conservative ideals, fearing discrimination based on their sexual orientation or gender identity. However, some deeply religious LGBTQ students, including those who have not come out, may feel pressure from family and friends to attend a religious college. Additionally, some may wish to pursue an area of study available only at a particular school. Still others may simply want to continue their education in a setting affiliated with their religion. Safety Net , a nonprofit organization founded in , fosters communication between

DOWNLOAD PDF THE ADVOCATE COLLEGE GUIDE FOR LGBT STUDENTS

LGBTQ students, faculty, staff, and alumni at more than 75 evangelical Christian colleges. Additionally, Safety Net helps students find information on gay-straight alliances GSAs affiliated with their schools, and can provide assistance to anyone who wants to start such a group. Find out if the school has filed for an exemption to Title IX that would permit them to discriminate on the basis of sex in hiring, admissions, etc. What advice do you have for students who may want to attend a traditionally conservative or religiously affiliated college? Overall, societal attitudes towards LGBTQ rights in America are trending positively, and even conservative schools are paying attention. Religious or conservative schools will soon find themselves at a disadvantage if they continue to neglect this population. It may be worth it to find out where in the stages of change is your prospective religious or conservative college. For most of us, college is a once in a lifetime experience. Pick a school that will allow you to make the most of it! My main advice is this: Do you feel safe walking around campus at night? How regularly do people yell slurs? Are there staff or faculty mentors who are out? Religion-wise, check in about the specific policies. Look closely and learn about what happens if you violate that rule. Your student health insurance may not cover hormones or surgery. Factor that into your decision. Will you be able to enjoy your leisure time? Is the town a place you might want to live after you graduate? Arts and Recreation Are there opportunities to enjoy art galleries, museums, concerts, and theater? Does the town have a movie theater, shopping mall, or recreational venues like bowling alleys, arcades, or amusement parks? Healthcare Check on the availability of healthcare facilities both on and near campus, including hospitals, medical offices, dentists, chiropractors, and urgent care clinics. Nightlife Does the town feature bars or restaurants that are popular with gay and lesbian patrons? The local Chamber of Commerce can provide information on job growth prospects, top employers, housing, regional resources, and more.

Chapter 4 : Brown left off Advocate's list of gay-friendly schools

"The Advocate College Guide for LGBT Students" (Alyson Books) profiles of the country's "best campuses" for lesbian, gay, bisexual and transgender students, and it arrives at a time.

By Jacob Ogles March 06 While moving from a small town in Kansas to politically liberal Lawrence offered a broader worldview, there remained no safe place to explore the still-forbidden thoughts he had wrestled with for years about his sexuality. Just two decades ago, such scholarships were unheard of, and it took until before any college in the nation allowed LGBT students to self-identify on college admissions material so they could easily learn about opportunities. The announcement that the Chad A. Since , he has provided funding annually for KU to provide a smaller scholarship , but he now looks forward to gifting students with a full undergrad education. Scholarships dedicated to assisting LGBT students were largely unheard before the turn of this century. Campus Pride launched in to provide an online resource to inform LGBT students about what was available at various campuses, something Windmeyer had researched and promoted since around The greatest resources for LGBT students remain in those parts of the country known for tolerance, Windmeyer says. The Pride Foundation offers several scholarships in the Northwest, for example. A native of Kansas himself, Windmeyer applauded KU for the growth of the scholarship. He noted, though, that the school still lags competitor Kansas State in providing on-campus support for LGBT students. Campus Pride keeps an index of schools providing such support as gender-inclusive housing and restroom facilities. Notably, KU did start offering gender-inclusive housing last year. The LGBT scholarship scene underwent a revolution in , Windmeyer notes, when Elmhurst College in Illinois became the first school in the country to allow students to self-identify as gay or lesbian on their applications, something that allowed college staff to connect students directly to scholarship opportunities. And the growth in resources available has grown substantially since then. The scholarship program started out as a financial resource for LGBT students in four-year advanced programs and has evolved to include a mentoring component. But throughout the nation, many scholarships still rely on individual donors giving during their lifetime or through their wills. Through the years, Leat has met scholarship recipients and encouraged them about their futures, particularly those pursuing fields in finance. He also hopes that providing a scholarship that benefits LGBT students will spur greater diversity and visibility of a community of campus where students can belong. That would be a huge contrast, Leat says, from when he attended school in Kansas and had no inkling of a community.

Chapter 5 : A Gay Man Does Good and LGBT College Students Reap the Windfall
