Chapter 1 : Lost in the Solar System by Joanna Cole

The Magic School Bus turns into a spaceship and takes the class on a trip zooming through the atmosphere, to the Moon, and beyond! With up-to-date facts about the solar system, revised for this edition.

The book depicts arguably the most well-known adventure of the series and introduces the character of Janet. The Friz decides to take the kids on a field trip to the planetarium, but, once they get there, they find the planetarium is closed. However, on the way back to school, Ms. Frizzle pushes a button that makes the bus transform into a rocket and blast off into outer space. Once in outer space, the bus flies to the Moon, where the kids make the most of the lesser gravity. Frizzle then takes them to the Sun and then Mercury, Venus and Mars before flying into the asteroid belt. However, while in the belt, the bus is damaged by an asteroid and the Friz flies out to fix the damage with a tether line connecting her to the bus. Janet reads through the book as they pass the outer planets and until they pass Pluto, leaving the solar system. Janet then flips through the book and finds the instructions for the autopilot, so they can fly back to the asteroid belt and rescue Ms. After they rescue the Friz, they return to Earth. Reception Michele Landsberg of Entertainment Weekly gave a very positive review of the book, saying that, "The fun is irresistible and the information substantial [Television adaptation The book was adapted into the first episode of the Magic School Bus television series to be broadcast. It is likely not the first episode produced i. For the most part, the episode is faithful to the book. Also in this one Arnold surprisingly suggests going to outer space himself to prove to Janet the truth. Also, instead of remaining in the asteroid belt, Ms. Frizzle uses her jet pack to fly off to another planet and provides the kids with clues as to her location via the radio on the bus. She, of course, turns out to be on Pluto. Arnold then demonstrates what will happen to her if she remains on Pluto by taking his helmet off, which freezes him and forces Janet to leave Pluto immediately. This ending, of course, makes Arnold the hero instead of Janet. Among arriving back to Earth, all Arnold got from the freeze-over was a cold, and then the alien-obsessed Ralphie fakes a news announcement about aliens discovered on Pluto, complaining about the junk Janet left. Ironically for a show intended to teach science, the episode has two large errors. The first being the aforementioned scenario in which Arnold takes off his helmet on Pluto without dying, and the second, repeating the urban legend that one can catch a cold from the cold. The common cold is a viral infectious disease and one especially cannot catch it in the virtually airless atmosphere of Pluto as Arnold does in the episode. The producer segment at the end of the episode addresses the former. This episode also marks the introduction of Janet in the TV series, and it is also the first time the bus is driven by the kids or someone other than Ms. Just download torrent and start playing it.

Chapter 2 : The Magic School Bus Lost in the Solar System Vocabulary Builder | Scholastic
