The Origin and Evolution of Neutron Stars Proceedings of the th Symposium of the International Astronomical Union Held in Nanjing, China, May ,

Open questions in the study of population III star formation S. Protostar formation in the early universe Naoki Yoshida; 3. The formation of the first galaxies and the transition to low-mass star formation T. Sellwood and Naoki Yoshida; 7. Effects of dark matter annihilation on the first stars F. Metal Enrichment, Chemical Evolution, and Feedback: Cosmic metal enrichment Andrea Ferrara; Insights into the origin of the galaxy mass-metallicity relation Henry Lee, Eric F. Bell and Rachel S. Three modes of metal-enriched star formation at high redshift Britton D. Turk, Steinn Sigurdsson, Brian W. Damped Ly systems as probes of chemical evolution over cosmological timescales Miroslava Dessauges-Zavadsky; Connecting high-redshift galaxy populations through observations of local damped Lyman alpha dwarf galaxies Regina E. Chemical enrichment and feedback in low metallicity environments: Effects of reionization on dwarf galaxy formation Massimo Ricotti; The importance of following the evolution of the dust in galaxies on their SEDs A. Young star clusters in the small Magellanic cloud: Kewley, Kirsten Larson and Leonie Snijders; Explosive Events in Low-Metallicity Environments: Low-mass and metal-poor gamma-ray burst.
