

Chapter 1 : The Urban Design Reader - Michael Larice, Elizabeth MacDonald - Bok () | Bokus

The Urban Design Reader offers not just an insight into the theory and practice of urban design using the work of some of the most influential writers of the last fifty years, but an inspiration to explore deeper and further.

Subjects Description The second edition of The Urban Design Reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design. Nearly 50 generous selections include seminal contributions from Howard, Le Corbusier, Lynch, and Jacobs to more recent writings by Waldheim, Koolhaas, and Sorkin. Following the widespread success of the first edition of The Urban Design Reader, this updated edition continues to provide the most important historical material of the urban design field, but also introduces new topics and selections that address the myriad challenges facing designers today. The six part structure of the second edition guides the reader through the history, theory and practice of urban design. The reader is initially introduced to those classic writings that provide the historical precedents for city-making into the twentieth century. Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late s up to the mids. These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places. The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places. These selections are largely describing the outcomes of mid-century urban design and voicing concerns over the placeless quality of contemporary urbanism. The fourth part of the Reader explores key issues in urban design and development. Ideas about sprawl, density, community health, public space and everyday life are the primary focus here. Several new selections in this part of the book also highlight important international development trends in the Middle East and China. Part Five presents environmental challenges faced by the built environment professions today, including recent material on landscape urbanism, sustainability, and urban resiliency. The final part examines professional practice and current debates in the field: The section concludes with several position pieces and debates on the future of urban design practice. This book provides an essential resource for students and practitioners of urban design, drawing together important but widely dispersed writings. Part and section introductions are provided to assist readers in understanding the context of the material, summary messages, impacts of the writing, and how they fit into the larger picture of the urban design field. Reviews "Every practitioner of "everyday urbanism" should keep the Urban Design Reader close at hand. It renews inspiration; it offers fresh insights; it clarifies the essential principles of urban design. I see it as the foundation text for all that we do in shaping our cities. It is simply invaluable. Table of Contents Part 1: Bacon The Islamic City: He is a licensed architect, planner, and urban designer. She is a licensed architect and a principal in the San Francisco-based firm Jacobs Macdonald: About the Series Routledge Urban Reader Series This exciting series responds to the need for comprehensive coverage of the classic and essential texts that form the basis of intellectual work in the various academic disciplines and professional fields concerned with cities. The readers focus on the key topics encountered by undergraduates, graduates and scholars in urban studies and allied fields, the contributions of major theoreticians and practitioners and other individuals, groups and organizations that study the city or practise in a field that affects the city. As well as drawing together the best of classic and contemporary writings on the city, each reader features extensive general, section and selection introductions prepared by the volume editors to place the selections in context, illustrate relations among topics, provide information on the author and point readers towards additional related biographic material.

Essential reading for students and practitioners of urban design, this collection of essays introduces the 6 dimensions of urban design through a range of the most important classic and contemporary key texts.

Architecture, University of California, Berkeley Philosophy Statement I am an urban designer with a multi-disciplinary perspective shaped by my education in city planning, landscape architecture, and architecture, and with a professional orientation shaped by years of design practice. In my research, I analyze issues related to urban physical development and the design of the public realm, with a particular focus on livability and environmental sustainability. I investigate how urban places came to be the way they are, analyze the long-term outcomes of implemented urban design projects and urban plans, and explore how physical form and human behavior interact. My objectives are to provide knowledge that addresses the emerging concerns of urban design and planning practice and to provide that knowledge in a way that is directly useful to practitioners and communities. I also engage in professional practice and in this work I seek to help communities find innovative ways to achieve their goals for greater livability and better environmental responsibility. I bring to my teaching and advising a dedication to the concerns of professional practice and responsiveness to the needs of students. My goals are to give students the intellectual background and skills they need to become top-notch professionals or academics, and to encourage them to think creatively and to be reflective. Biography Elizabeth Macdonald, Ph. Macdonald studies public space design, with a focus on challenging long-standing and entrenched street design standards and norms that prioritize motorized vehicle movement over other uses, the evaluation of implemented urban design plans and projects, and designing for livability and environmental responsibility. Her recent book, entitled *Urban Waterfront Promenades* Routledge, , presents 38 promenade case studies, analyzing their physical form, social use, the circumstances under which they were built, the public policies that brought them into being, and the threats from sea level rise and the responses that have been made. She is also author of *Pleasure Drives and Promenades*: Professor Macdonald has also published widely in academic journals and produced research papers for professional audiences. Most recently, she has published on the planning dimensions of sustainable urban design *Journal of Urban Design* , a standardized rating tool for evaluating the pedestrian quality of urban streets *Journal of Urban Design* , pedestrian wind comfort *International Journal of Sustainable Development and Urban Ecology*, Sustainability, *Journal of Urban Design* , and the efficacy of long-range physical planning in Vancouver, B. *Journal of Planning History*. Roots, Influences, and Trends: Professor Macdonald is a registered architect and principal of Jacobs Macdonald: Cityworks, an urban design practice formed in collaboration with her partner Allan Jacobs. She works nationally and internationally on urban design and planning projects. Prior to academia, she spent ten years as a practicing architect in the San Francisco Bay Area. Her studio courses include a focus on graphic and oral communication skills for presenting design research and proposals in ways that are readily accessible to community members, political decision-makers, and fellow professionals.
