*theinnatdunvilla.com*RS Book one- Into the Wild The Warriors series was able to hook me and bring me into the story. These books are about a housecat named Rusty.

Conception[edit] Feral cats seemed like an excellent compromise between regular domestic pussycats and a truly wild animal: Although the original plan was a stand-alone novel, enough material was created for several books, and the publisher decided upon a six-volume series. Afterwards, Holmes began to like the idea of using cats since she realized how thoughtful they can be leading private lives without any humans realizing. The last name Hunter was chosen since it put the books next to the Redwall series which has a similar genre. For a limited time, the complete novel was also available online. In Germany, the book has also been released as an audiobook. List of Warriors characters The fictional forest of the novel was inspired by New Forest above and other locales in England and Scotland. ThunderClan is outnumbered and their deputy, Redtail, calls a retreat. In ThunderClan territory, the medicine cat, Spottedleaf, receives a prophecy from the spirits of their ancestors, StarClan: Rusty, a house cat, runs into a ThunderClan apprentice, Graypaw, in the forest in his backyard. Rusty, however, does not run away, but fights back. Rusty asks to think it over, and after talking it over with his best friend and neighbor Smudge, decides to go with the Clan cats. Lionheart and Whitestorm meet him the next day and lead him to the camp. Due to his house cat past, some members of the Clan are hostile towards Rusty. This hostility eventually leads Rusty to attack Longtail, losing his collar in the ensuing fight. Bluestar then ends the fight and announces that Rusty has earned his apprentice name, Firepaw. He forms a strong bond with Graypaw, and with Ravenpaw, who is the apprentice of the ambitious warrior Tigerclaw. Firepaw overhears Tigerclaw falsely accusing Ravenpaw of having told ShadowClan of the journey to the Moonstone, and learns from Ravenpaw that Tigerclaw killed Redtail. Searching for the kits, Firepaw and Graypaw lead Ravenpaw to a barn where he can be safe and have company, living with a loner named Barley. Firepaw then leads a rescue party to rescue the lost kits in ShadowClan territory and emerges victorious. Tigerclaw, still trusted by the Clan, suspects Firepaw knows his secret. Because of their heroism on the rescue party, Firepaw and Graypaw are promoted to warriors by Bluestar, who gives them their warrior names, Fireheart and Graystripe. Style[edit] "Into the Wild did occasionally remind me of the Harry Potter books, both in writing style and content. Rusty forms a firm friendship with an apprentice warrior in training, more than six months old called Graypaw, a longhaired solid grey tom. Graypaw adds the laughter to what is, when you really think about it, a rather gritty story. Cats such as Bluestar and Yellowfang form the older authority figures. These two characters reminded me of Dumbledore and Snape though not too closely. The narration stays with Firepaw until the next series, Warriors: A reviewer for The Plain Dealer wrote that the book "is patterned in the style of classics by J. Tolkien or Brian Jacques". In the book, instead, of using "said", Cary uses the word "mewed". Though troubled on what to write about at first, Holmes realized she could add human themes and issues into the book such as "war, politics, revenge, doomed love, religious conflict". Cherith Baldry feel that the growth of genre is due to the fact that "fantasy is something very deeply rooted in the human mind, not just for children". Fantasy stories are able to deal with human emotions helping readers to deal with them in the real world. Another Erin Hunter , Kate Cary felt that fantasy books such as Harry Potter "is a sign of a deepening need for fantasy to brighten our lives". Other themes include "death and spirituality and family and relationships". Reviews have note how the story does not cover up the hardships of Clan life. The review also praised the world of the cats and themes put into the book. The review also felt that there was too many supporting characters, but "there are standouts who give dimension to the tale". The amount of violence was also noted in the review. Snapping bones, flowing blood, and sudden death abundantly demonstrate how these cats walk on the thin edge of survival". The review noted how teens would see how hard it is for Firepaw to fit in.

The level of trolls it has gotten has reached levels I cannot stand anymore. Of course, there are reviews with more trolls, but this is as much as I can endure. The first thing you need to know about me is that I hate cats. I hear one, and I shudder. I see one, and I want to vomit. One gets near me and the good girl inside me is in risk of going far far away. The second thing you need to know is that I hate stories about talking animals. I literally cannot watch a TV show or a movie where there are talking animals without going insane. Really, I get so exasperated and furious I fear my heart will stop working. I regret my decision. Clans of cats fighting? Also, the amount of absurd names was overwhelming to the point where I wanted to kill myself. Look at some examples: You may have noticed that I highlighted some of the names Some awkward sentences contributed to my almost madness too. I tried doing it and I failed. My brother tried and he failed too. My mother is part of this group too and my sister as well. This felt just as wtf as the previous one: Yellowfang looked up at Bluestar and narrowed her eyes respectfully. How do you do that? Or maybe like this? The unnecessary deaths were also another bug for me. I mean, wtf, who the hell is Redtail? There were many pointless ones. Why did they die?
